

## Summary

**CyphraTek™** is an email toolkit that has added advanced patented technologies to provide services beyond a simple email exchange. As a solutions provider, **CyphraTek™** has partnered with legal entities to ensure ethical and compliance challenges are exceeded. This partnership provides an opportunity to exchange email in a private protected manner between legal providers and those they are providing service to and exchanging with.

## Challenge

Legal entities both large and small are routinely challenged during case administration to maintain client billing and accounts receivable. Emails are used to exchange case related communications. So why not take advantage of email to bill customers and provide payment processing?

## Solution

**CyphraTek's @OptIn** email services provide legal entities the ability to confirm with client receipt of billing electronically, delivery confirmation, and provide electronic transaction options. In addition, **CyphraTek's** technology **is patented** in the United States, Canada, and Europe. Legal entities can leverage this technology from wherever they practice to increase efficiencies in their practice.

## Results

Today **CyphraTek™@OptIn** is the legal services office administrators best-in-class option to exchange billing, increase office efficiencies, and decrease the billing cycle. Allowing lawyers and administrators to focus on new business and account management.
